

## Skymule

### The environmentally friendly transport solution for your plantation

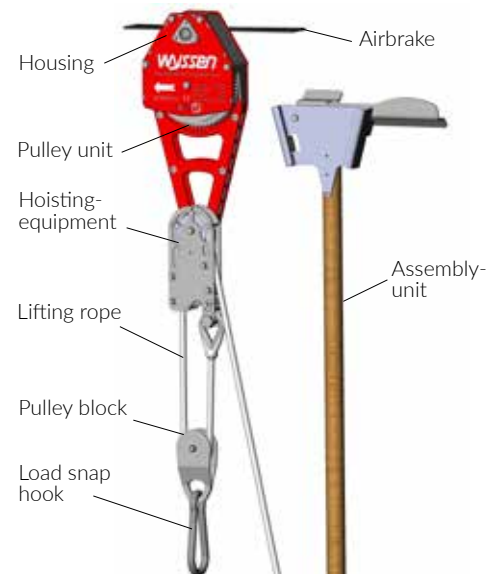

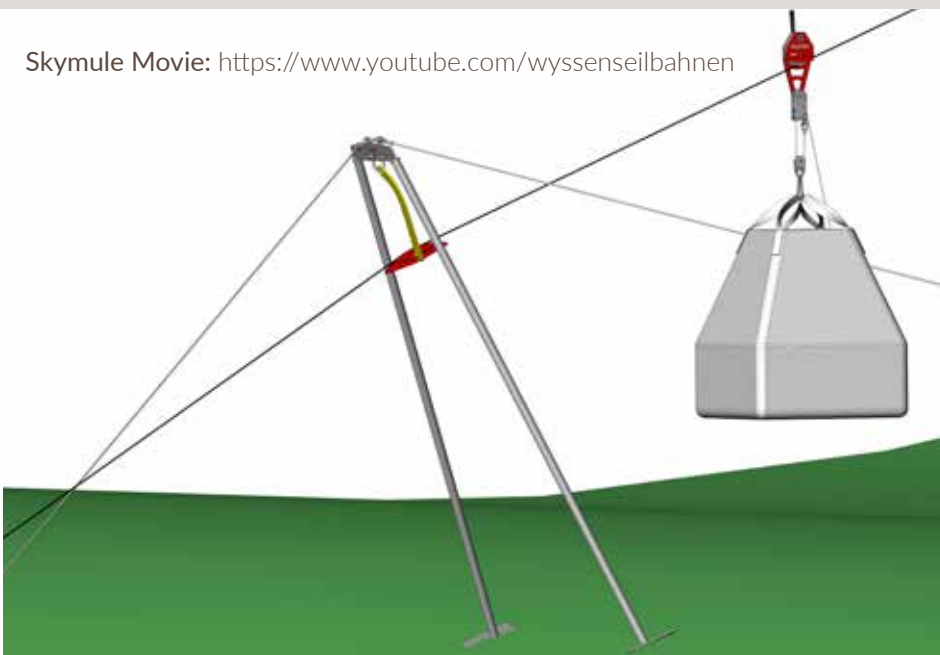

The low cost Wyssen Skymule is ideal for transport downhill in steep terrain. Thanks to its simple, fast and flexible design, the Skymule enables efficient and speedy transport over steep terrain.

### Features

- Unlimited cableway length possible
- Fast and simple assembly and removal
- Any number of supports can be assembled
- High Productivity -> Several loads can be transported simultaneously
- Skymule only weighs 4.5 kg -> easy to carry
- Environmentally friendly: No operating power / motor necessary, transport is by gravity
- Speed control by wear-free propeller air brake
- Simple hoisting of the load by means of pulley block
- Loading and unloading can be carried out flexibly at any position
- Slow and controlled delivery to the valley
